

VMC Panel

VMC Panels System

System Description :

The Variable Manhandling Column (VMC) System is a man-handling column system suitable when no cranes are available. The column cross-section flexibility (in 5 cm increments) makes it easier for re-adjustment without the need for reassembly. The system has been equipped with a concrete platform to ensure its safety, flexibility, and economic advantage.

Advantages :

- Equipped with a concreting platform for safety.
- Suitable where a crane is not available.
- Easy to adjust without re-assembly due to the flexibility of column cross-section (5 cm grids).

System Application :

- Foundations
- Column

Features :

Cost Effective

Simple Structure

Time saver

System Main Components :

- Panels C/W ACROW PVC board.
- Connecting parts (ACROW bolts)
- Concreting platform
- Titling items
- Tie rods
- Tubes for alignment

System Capacity :

70 KN / m²
